

HermanMiller
Thrive Ergonomic Portfolio

2014–15 Catalog

Our design is based on your design.
You're unique. You're human.
And from your brain to your body
and even the way you like to
work, you're constantly evolving.
That's why we designed our Thrive
portfolio to adapt to you, letting you
move and work the way your body
was meant to. Whoever you are and
however you work, we're here to
help you thrive.

What Does It Mean to Thrive?

The answer's different for all of us. Thrive lets you choose the right mix of tools to support all the things you do, like thinking, creating, and collaborating. From your ergonomic chair to your table, technology supports, lighting, and work tools, the whole portfolio is designed to respond to your changing needs throughout the day. When you put it all together, work can be a healthier, more fulfilling part of life. When it all comes together, everyone can thrive.

Good for You.

Good for Business, Too.

When you give your body the support it needs to thrive, a funny thing happens. It can help your business thrive, too. Research shows that incorporating ergonomics and taking a proactive approach, can make a measurable difference in what companies spend on healthcare and workers' compensation each year.

Each year back pain costs companies an estimated \$7,400,000,000

47%

Office workers spend 47% of their time doing computer related work.

3X

At age 60, our eyes need 3 times as much light to see as they did at 20.

91%

Computer vision syndrome affects almost 66 million people. 91% of all computer users suffer from eyestrain.

8/10

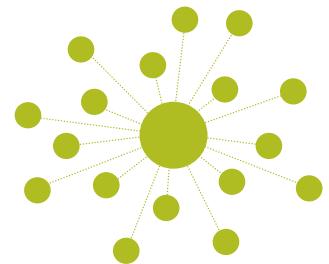

8 out of 10 workers experience back pain at some point.

\$17.50

Return on Investment

For every dollar invested in an ergonomic intervention strategy in an office environment, there is a return of \$17.50.

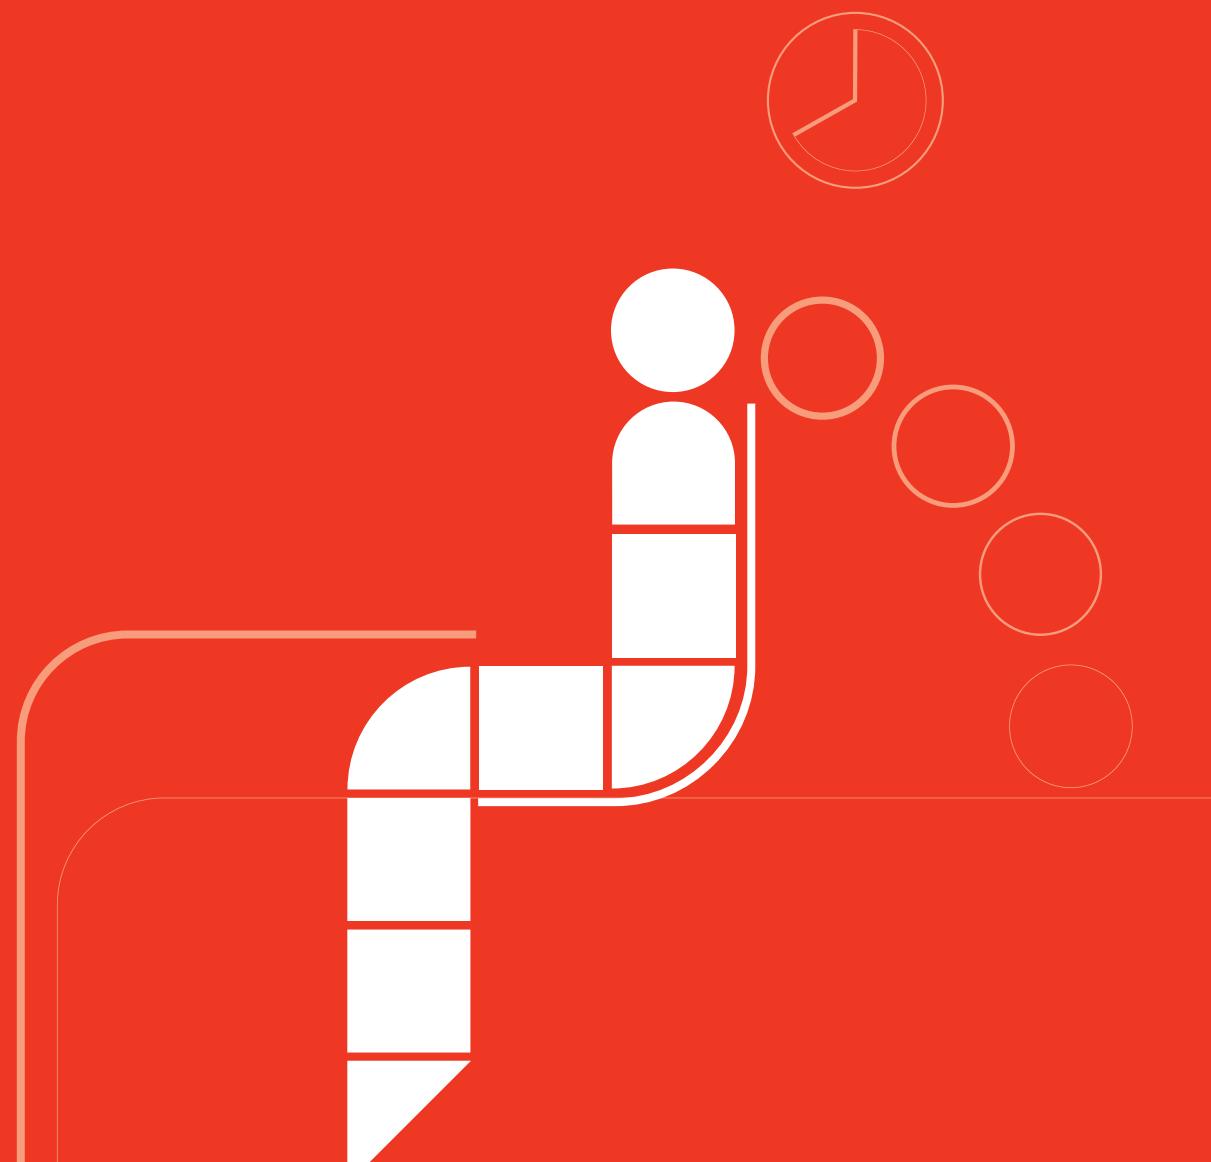

Our Knowledge
Goes Way Back

Our Products, Way Ahead

Thrive comes from a long line of innovators, design experts, and award winners. Years of studying how people work have produced a string of firsts that help people feel better and work better. And there are plenty more where those came from.

You Sit More Than You Sleep

A comfortable bed is important for your body, but studies show you actually spend more time in your chair. At Herman Miller, we understand how much sitting asks of our bodies, and we've designed the most innovative chairs on earth to meet those needs. Millions of people spend the majority of their day with us. Now it's your turn to try our chairs, too.

Backed by Science

Herman Miller seating is recognized for its distinctive design, but it's the science behind our seating that creates that "WOW" experience every time you sit down.

PostureFit Sacral Support

Proper seated posture is essential to feeling as good at the end of your day as you do at the beginning. We feel so strongly about helping you do your best work that we've built our game-changing PostureFit sacral support into the backrest of every ergonomic work chair since Aeron.

Healthy seated alignment starts at the base of your spine, or your sacrum. PostureFit sacral support prevents slouching, which can compress your discs and prevent spinal fluid from flowing through. Instead, you stay in a healthy seated position, keeping your blood and oxygen flowing and preventing back and neck pain. The only thing you need to focus on is the work at hand.

Balanced Recline

Reclining in your chair should be as mindless as breathing. No one wants to have to work to sit back in their chair, or to maintain a seated reclined position.

Herman Miller's proprietary tilt technology is designed to mimic the natural movement and pivot points of your body, keeping you balanced, regardless of your size and stature, as you move from upright to reclined seated positions.

Dynamic Support

The best work chairs fit you – they don't ask you to fit them. From the Pixelated Support in the Embody seat and backrest to the Pellicle suspension in Aeron, Herman Miller work seating features dynamic surfaces to conform to your unique shape and seated movements, eliminating pressure points and allowing blood and oxygen to flow, keeping you focused and alert.

Zoned support is built into the suspension backs of many of our work chairs, providing more support along your spine, where you need it most, and less along the edges of the back, where you need to be able to flex and turn. This creates the perfect flex map to support your unique back shape and sitting style.

Embody®

Designed by Bill Stumpf
and Jeff Weber

The Pixelated Support in the seat and backrest form a dynamic surface that stimulates blood and oxygen flow by reducing seated pressure. All that oxygen helps you think better.

How It Works For You

The chair back adjusts instinctively to every move you make and keeps support of your lower back constant.

Embody keeps you in a neutral, balanced posture as you work, so you stay relaxed and focused.

Warranty/Product Number

12-year, 3-shift parts and labor

The Science of Healthier Sitting

More than 30 professionals contributed their expertise to the design of Embody. Physicians and PhDs in biomechanics, vision, physical therapy, and ergonomics helped test hypotheses, review prototypes, and conduct studies to guide the development of the first health-positive chair.

Aeron®

Designed by Bill Stumpf
and Don Chadwick

It's the first ergonomic work chair to replace upholstery with breathable, form-fitting suspension that adapts to virtually every body and keeps you cool and focused.

How It Works For You

Patented, breathable Pellicle® suspension material lets heat and moisture dissipate while giving your body dynamic support.

PostureFit sacral support aligns your lower back in a health-positive position, decreasing muscle fatigue and improving endurance during long periods of sitting.

The chair's tilt design mimics the body's natural pivot points at the hips, knees, and ankles, supporting you naturally from an upright to fully reclined position.

Warranty/Product Number

12-year, 3-shifts, parts and labor
AE113AWB

Reinventing Support

Fidgeting is one of the first signs of discomfort. Typically, we start to shift in our seats when pressure points inhibit blood and oxygen flow or we get too warm. Aeron's Pellicle suspension eliminates the very things that cause discomfort. The suspension conforms to your body, evenly supporting your seated motions and eliminating pressure points. In addition, Pellicle allows moisture to dissipate and air to circulate, keeping you cool, comfortable, and focused during long periods of sitting.

Mirra® 2

Designed by Studio 7.5

Today, work is more active. We spend our day flexing between focused and collaborative work. Mirra 2 moves at one with your body. When you sit, Mirra 2 adapts to you instantly. Shift and it dynamically supports even your slightest movement. Mirra 2 advances how you sit.

How It Works For You

The Mirra 2 Butterfly Back, with its exceptional responsiveness and intuitive feel, results from inventing a method for merging a fabric layer with polymer veins to create an intelligent support structure. This hybrid structure, shaped for dynamic support, keeps your body in healthy alignment.

Warranty/Product Number

12-year, 3-shifts, parts and labor
MRF123AAF

**Celle®**

Designed by Jerome Caruso

Celle's dependable, hard-working design fits you like a glove. It's the perfect combination of innovative support, great looks, and more comfort than any other work chair in its price category.

How It Works for You

Cellular Suspension™ system is available in the seat and back, and provides the perfect flex map for supporting your body.

PostureFit sacral support aligns your lower back in a health-positive position, decreasing muscle fatigue and improving endurance during long periods of sitting.

Harmonic™ tilt design mimics your natural movements from upright to fully reclined.

Warranty/Product Number

12-year, 3-shifts, parts and labor

SAYL®

Designed by Yves Béhar

When you settle into the frameless back of a SAYL chair, you experience unprecedented freedom of movement and beautiful support.

How It Works For You

The 3D Intelligent suspension back has support molded in, eliminating hard edges and the need for a frame.

Flexible elastomer back adapts to each person's unique shape and provides exceptional comfort and support for just about all body types.

Mix colors on the seat, back, and arm pads for a bold look, or match them for a more traditional appearance.

Warranty/Product Number

12-year, 3-shifts, parts and labor
AS1SA23AA

Inspired by Suspension

Designer Yves Béhar began his research into a new work chair by looking at examples of design that deliver the most with the least. He wondered: Can the same principles that suspend a bridge over water be applied to a chair? The answer was yes, and the result is SAYL. Its suspended, frameless back encourages healthy movement.

Setu®

Designed by Studio 7.5

The sophisticated design complements all of the places you meet and sit. Adjustments are simple—your weight controls how the chair moves and conforms to your body.

How It Works for You

Innovative Kinematic Spine™ bends and flexes automatically with your every move.

Lyris 2 suspension material offers superior support while conforming to your contours.

Five-star base provides stability while working and has casters to keep you mobile.

Warranty/Product Number

12-year, 3-shifts, parts and labor

Consider Changing Your Position On This

Your body's not designed to stay in one place all day. So if you have to sit, you need a chair that lets you move naturally. And if you can switch between sitting and standing, even better. Fewer aches and pains, fewer doctor visits, and happier employees. Performance tables give you lots to feel good about.

A Platform for Productivity

Designed to support a variety of work tools and work styles, our tables create an important link between your body and all of your other ergonomic solutions.

Fixed Tables

Because work can happen anywhere, you need tables designed to go here, there, and well, everywhere. The fine lines, simple aesthetics, and unlimited options of Everywhere let you shape a cohesive work environment around the needs of any person, room, or activity.

Adjustable Tables

Lead, and your furniture will follow, letting you move between a variety of healthy postures throughout the day. The unique worksurface of Envelop moves back and forth, staying comfortably within reach whether you're sitting up or leaning back in your chair. And Renew Sit-to-Stand Tables encourage you to move, raising and lowering your worksurface intuitively whenever you want to sit or stand.

Renew™ Sit-to-Stand Table

Designed by Brian Alexander

Intuitive control lets you change your position naturally, switching between two healthy postures: standing and sitting in a chair with PostureFit.

How it Works for You

Integrated cord management supports your table, technology, and task light while remaining neatly out of sight. Top-to-bottom design looks good from any angle, protects your knees under the table, and integrates easily with the furniture you have.

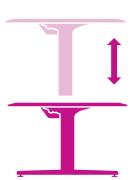

Warranty/Product Number

5 years: Mechanical components
3 years: All service parts
2 years: Electrical components

Switch It Up

A physical workload that's too low (sitting all day) or too high (standing all day) increases the risk of back pain. Ergonomists recommend standing anywhere from five to twenty minutes every hour.

Intuitive switch moves the table up or down while you keep your eyes on your work.

Integrated cord management presents a clean look from any angle.

A hinged cable management tray keeps cords accessible but cleanly out of sight.

Access to AC and DC power above and below the worksurface is seamlessly integrated into Renew.

Everywhere™

Designed by Dan Grabowski

Two traits give these tables their anywhere versatility. Fine lines—a refined, single aesthetic means they complement any space, bringing unity and visual calm. And no boundaries—a simple kit of top shapes and leg styles can be combined in nearly limitless ways. If these choices aren't enough for you, feel free to create your own; Everywhere tables are easy to customize.

How it Works for You

Choose from multiple top shapes, leg styles, and finishes for a custom look. Available with casters to rearrange fast. Use for meetings, training, a mobile work surface—or all of the above. Optional flip tops let you nest tables for efficient storage.

Warranty

12-year, 3-shifts, parts and labor

Endless Possibilities

Pick your shape, size, finish, and leg style. You name it, Everywhere has it.

Envelop® Desk

Designed by Bill Stumpf
and Jeff Weber

Named for the flexible work surface that slides to envelop you, this adjustable-height desk supports a full range of sitting and standing postures.

How it Works for You

Front surface slides forward and pivots down, flexing to support your arms and wrists.

The soft, resilient surface reduces pressure and eliminates awkward wrist positions.

Ideally paired with an ergonomic chair with a synchronous tilt mechanism.

Available with pin height or electric sit-to-stand height adjustable legs.

Warranty/Product Number

12-year, 3-shifts, parts and labor
2-year electric

All Together Now

Envelop is the first desk designed to help you, your chair, your work surface and your technology work in harmony. After researching the way people shift between reclining, sitting up straight and leaning forward, Bill Stumpf and Jeff Weber hit upon the ingenious—and unheard-of—idea of designing a work surface that could move as fluidly as you do, keeping you in healthy alignment no matter what posture you choose.

What's Technology Turning You Into?

The “turtle” is just one of the awkward positions you can get into when technology gets out of line with your body. Using technology support tools like monitor and keyboard supports can change that, keeping you in harmony with all sorts of equipment and whatever device is invented next. All you need are a few simple adjustments to take control and feel human again.

The Well-Adjusted Workplace

We've put together a whole range of adjustable supports to help your technology conform to your needs.

Dynamic Monitor Supports

A fluid range of motion lets you position tablets, laptops, monitors, or multiple screens wherever you need them, even below eye level for bifocal or touchscreen use.

Multiple Monitor Solutions

Did you know that adding a second monitor can boost your productivity up to 40%. Our high-density solutions are extra-strong to hold multiple screens right where you need them and scalable to accommodate more screens as your needs change.

Healthy Keying Postures

Much like the steering wheel in a car, you can tilt and adjust a keyboard support to suit the way you work. Together, a keyboard mechanism, tray, and mousing surface help you comfortably interact with your technology and get the most out of your work chair.

Easy Access to Power and Data

Keeping power and data access at the desktop prevents awkward stooping and bending every time you need to plug in, charge up, or unplug from a shared workspace.

Flo®

Designed by Colebrook Bosson
Saunders

The range of motion and fluid, intuitive adjustments of the award-winning Flo are unsurpassed. Its patented geometric spring technology and dynamic fingertip control let you put your screen exactly where you want it with a minimum of effort and a maximum of precision. Unlike any other product on the market, it supports everyone's eyes, even those with progressive lenses.

How it Works for You

Effortlessly rotates between portrait and landscape orientations.

Patented geometric spring technology holds any position.

Mounts easily to most vertical or horizontal surfaces and allows easy installation/removal of monitors.

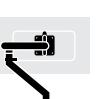

Warranty/Product Number

12-year, 3-shifts, parts and labor
Y91171

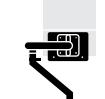

Anywhere You Want It

Everyone's eyes are different, and now everyone's perfect monitor position can be unique, too. The entire Flo family is designed with smooth, intuitive adjustments that let you choose the vertical, horizontal, and tilt position you need to reduce eyestrain and encourage healthy sitting positions—making it a truly dynamic support.

1 Monitor

1 Laptop

1 Tablet

Flo Dual

Designed by Colebrook Bosson
Saunders

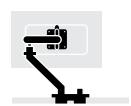

A multiple-screen version of the award-winning Flo monitor arm, Flo Dual supports two screens from a single clamp, allowing smooth, intuitive adjustments of each monitor.

How it Works for You

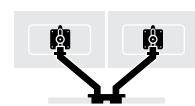

Uses Flo's patented geometric spring technology for effortless adjustment to any position (landscape or portrait). Mounting and installing/removing monitors are simple.

Warranty/Product Number

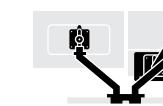

12-year, 3-shifts, parts and labor

Flo Modular

Designed by Colebrook Bosson
Saunders

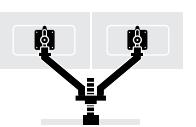

A scalable approach makes the most of shrinking real estate by supporting multiple monitors from a single post.

How it Works for You

Flo's patented geometric spring lets you move between landscape and portrait positions or sitting and standing effortlessly. Mounting and installing removing monitors are simple.

Warranty/Product Number

12-year, 3-shifts, parts and labor
Y91176

2 Monitors

Flo Plus

Designed by Colebrook Bosson
Saunders

A heavy-duty version of the award-winning Flo monitor arm, Flo Plus offers smooth, intuitive adjustment of monitors or all-in-one computers ranging from 20–40 lbs.

How it Works for You

Uses Flo's patented geometric spring technology for effortless adjustment to any position (landscape or portrait). Mounting and installing/removing monitors are simple. Can be easily converted to support two monitors.

Warranty/Product Number

12-year, 3-shifts, parts and labor
Y91174.1

1 Monitor or all-in-one

Flo Plus Dual

Designed by Colebrook Bosson
Saunders

Like Flo Plus, Flo Plus Dual uses a crossbar design with a handle to allow smooth, intuitive, and precise adjustments of two large or heavy screens (up to 40 lbs total weight) moving in tandem.

How it Works for You

Uses Flo's patented geometric spring technology for effortless adjustment to any position (landscape or portrait). Mounting and installing/removing monitors are simple. Can be easily converted to support one monitor.

Warranty/Product Number

2 Monitors

Flo Rail Tile Mount

Designed by Colebrook Bosson
Saunders

Compatible with most Herman Miller panel-mounted rail systems, this version of the award-winning Flo monitor support features a horizontal arm to let users adjust the height, tilt, and focal length of monitors ranging from 7–20 lbs.

Warranty/Product Number

12-year, 3-shifts, parts and labor
Y91171.RTM

Tablet Mount

Designed by Colebrook Bosson
Saunders

The Tablet Mount moves mobile technology off the work surface, placing it at the correct height and angle to minimize eyestrain. A locking mechanism secures equipment when you step away from your desk.

Warranty/Product Number

12-year, 3-shifts, parts and labor
Y91173

Laptop Mount

Designed by Colebrook Bosson
Saunders

The Laptop Mount lifts notebook computers off the work surface, allowing workers to adopt better postures and avoid eyestrain while clearing valuable desk space.

Warranty/Product Number

12-year, 3-shifts, parts and labor
Y91177

Lapjack®

Designed by Colebrook Bosson
Saunders

Lapjack lets you put your laptop or tablet at a healthy ergonomic height that reduces eye, back, and neck strain, in the home office or on the road. Designed to be used with a separate mouse and keyboard. Folds flat to carry.

Warranty/Product Number

12-year, 3-shifts, parts and labor

Starin R9861008NA

Wall-Mounted Technology LD Series

This track-mounted support takes full advantage of vertical space, storing up to 20 lbs of technology up and out of the way and folding within seven inches against the wall when not in use. Treated with anti-microbial finishes, and is available with an attachable CPU support. Ideal for clinical or patient bedside applications.

Available with a 16" extension arm.

How it Works for You

Measures 14" x 11" x 5."

Available with 32" or 48" wall tracks.

Supports screens up to 20 lbs.

Designed to mount to Compass™ wall tiles.

Warranty/Product Number

12-year, 3-shifts, parts and labor
Y94008

All About Efficiency

In clinical applications, lean means simple, functional, and moveable—no unnecessary surfaces, extra storage, or built-in components.

Wall-Mounted Technology HD Series

Built for heavy-duty technology, this track-mounted support can hold up to 40 pounds, then fold within seven inches of the wall when not in use. Available with an attachable CPU support, it is ideal for use with high-definition screens or all-in-one CPUs in clinical or patient bedside settings. Treated with anti-microbial finishes, the HD Series features a secondary surface where caregivers can set a chart or clipboard while typing.

Available with an 18" extension arm.
Designed to mount to Compass wall tiles.

Warranty/Product Number

12-year, 3-shifts, parts and labor
Y94010

Wall-Mounted Technology FX Series

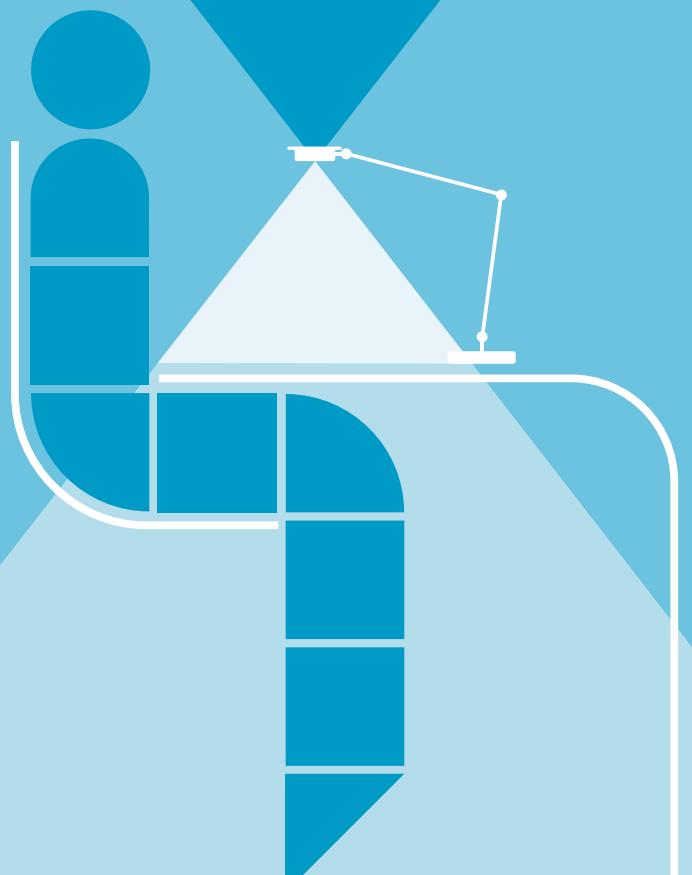

This slim-line option is ideal for education or healthcare hallways where space is at a premium. The track-mounted support holds monitors up to 15 pounds and folds within four inches of the wall when not in use. An attachable CPU support is also available, and anti-microbial finishes and integrated wire management come standard.

Designed to mount to Compass wall tiles.

Warranty/Product Number

12-year, 3-shifts, parts and labor
Y94004

Do You See What I See?

Each of us sees the world differently depending on our age, the light in the room, and even the work we're doing. Just because you have enough light to see and read doesn't mean you have enough to support your eyes' health. Once you've experienced how much better you feel with proper lighting, you'll see how essential it is to your sense of well-being. A personal task light is as important as any other tool in your work area, letting you shape an environment that helps you do your job more effectively.

A Visible Difference

From light quality to personal control, energy savings, and design options, our portfolio is full of bright ideas.

Clear, Even Light

Our lights are color rendered to help you interpret colors correctly. Unlike typical LEDs, they're also designed to cast light evenly, avoiding spotlight effects and helping you see your work.

User Control

All lights in our collection are designed to let you choose when, where, and how to light your workspace appropriately. Moveable bases and articulating arms put the light precisely where you need it, and dimming switches on many lights let you adjust for certain tasks or times of day.

Energy Savings

LEDs use 75 percent less energy and last 25 times longer than traditional bulbs. Auto shutoff on most lights prevents wasted energy when people are away from their desks, helping you save even more.

Aesthetic Options

From classic to contemporary and minimalist to statement-making, our lighting collection has beautifully designed options for any environment.

Tone™**Designed by Tom Newhouse**

Tone balances performance and price like no other. A swiveling base and articulated joints give precise control over what you light. The user adjustability, dimmer, and automatic shutoff make it one of the best LED lighting values in the market.

How it Works for You

Freestanding base, clamp mount, or rail tile mount fits any environment.

An intuitive touch turns it on and off.

Auto shutoff saves energy by turning off after 9 hours.

Draws just over 6 watts.

UL Listed.

Warranty/Product Number

5-year, 3-shift, parts and labor
Y6481 / Y6480

**Made in Michigan, Designed for the Earth**

We're proud to say Tone is made in Herman Miller's home state of Michigan. That goes for all major components—even the circuit board. And at 98% recyclable, it's a smart choice for our home planet, too.

Flute™**Designed by Tom Newhouse**

Bright light, big value—Flute features economical LED technology. The estimated operating cost is a little over a dollar a year.

Warranty/Product Number

5-year, 3-shift, parts and labor
Y6470

**Luxo 360****Designed by Stephan Copeland**

A unique rotating table/desk base and head let you intuitively adjust this dimmable light a full 360 degrees, keeping the lamp head parallel to the work surface for long-lasting, glare-free LED illumination. Automatically turns off to save energy.

Warranty/Product Number

5-year
Luxo 16622

**Ardea™****Designed by Yves Béhar**

Flexible hinges at the base and head give Ardea an infinite range of motion. The compact mini-fluorescent bulb uses one-fourth the energy of an incandescent bulb and lasts three to four times longer.

Warranty/Product Number

5-year, 3-shift, parts and labor
Y6460

Luxo Ninety

Designed by Shawn K. Littrell

High design meets low energy. The Luxo Ninety is a dimmable LED task light that spins and swivels at the base so you can direct light where you need it most. Automatically turns off to save energy.

Warranty/Product Number

5-year

Luxo 16752

Luxo L-1 LED

Designed by Jac Jacobsen

The original architect lamp offers a flexible, spring-balanced arm, long-lasting dimmable LED performance, and a classic design that lets you position light exactly where you need it. Automatically turns off to save energy.

Warranty/Product Number

5-year

Luxo L1A 50009

Luxo Ovelo

Designed by Stephan Copeland

The fully adjustable, spring-balanced, pivoting arm and head of this dimmable LED task light offer complete control of illumination. Automatically turns off to save energy.

Warranty/Product Number

Thrive Today, Thrive Tomorrow

We put a great deal of thought into designing, innovating, and engineering our products—but the products are only part of the equation. At Herman Miller, we also offer something else designed to keep you supported and comfortable: our legendary service.

Herman Miller Dealer Partners

It begins with our network of dealers, whose understanding of your goals, challenges, and costs can guide you in designing a solution that supports your body, fits your culture, and uses your furniture to its full potential. Our seasoned dealer teams, project managers, and installation professionals will take care of every detail to ensure the design, specification, financing, delivery, and installation are smooth, on time, and on budget.

Human Factors and Ergonomics Specialists

Our service continues with Thrive representatives, who are highly educated in ergonomics. We offer a range of consulting services including workstation evaluations, educational seminars, specialized ergonomics training, and even product design consultation. By applying the science of ergonomics to work habits and workstation design, we can help you reduce risk factors while increasing employee health, comfort, and productivity.

Warranty

We created Thrive to give you everything you need to make sure your workplace works for you, including an industry-leading warranty. For further information on our warranty, please visit hermanmiller.com.
